

Kickdistance 2026: Checkpoints

(version 24.5.2026)

General Provisions

The route from Budapest to Prague may be chosen freely by the participants. However, there are five mandatory control points (CPs), each with a designated route section that must be followed. A short mandatory section immediately after the start in Budapest and another immediately before the finish in Prague are also prescribed. Additional control points are located in Bratislava, Vienna, and Brno.

All designated route sections must be ridden exactly as specified. Deviations are only permitted in cases of force majeure or other exceptional circumstances that make adherence impossible.
